PORTFOLIO

2026

ANTHEA LAU

HI, I’M ANTHEA.
I BLEND STORYTELLING WITH PERFORMANCE RIGOR TO BUILD SYSTEMS FOR GROWTH & ENGAGEMENT —CONNECTING STRATEGY, MEDIA, CONTENT, COMMUNITY, AND COMMERCE FOR GLOBAL BRANDS, STARTUPS, AND NEW VENTURES.

This portfolio was self-designed. Every detail from layout to narrative.

HOW I GOT HERE

Careers rarely move in straight lines. Mine has followed a consistent thread: shaping how ideas travel, from signal to understanding, from attention to action.

I began in performance-led environments, where growth was measured precisely and earned through experimentation. At eBay and IG Group, I worked in regulated, high-pressure contexts, learning how to build acquisition systems that were not only effective, but disciplined — grounded in data, governance, and control.

From there, the focus widened. At Xiaomi, I repositioned a challenger brand, aligning digital, retail, and partnerships to accelerate market credibility. And at Nike, I moved closer to the product itself, designing O2O experiences, content and community systems within the Nike Training Club app, where engagement could be tested and shaped in real time.

Over time, the work moved beyond execution into structure. At Duracell and Tezos, I built the underlying systems, defining frameworks, aligning teams, and bringing clarity to fragmented global operations. The challenge was no longer just performance, but coherence, ensuring that strategy, narrative, and delivery moved in step.

At NEOM, that trajectory converges. I operate at the intersection of narrative, digital systems, and large-scale transformation, building content and marketing engines that translate complexity into clarity — spanning leadership alignment, investor communication, and global storytelling, where precision matters as much as imagination.

Across each stage, the principle has remained the same: to bring structure to ambiguity, and to design systems where growth is repeatable.

OXAGON MASTERPLAN 08-14

NARRATIVES IN FILM 15-16

OXAGON X McLAREN ACCELERATOR 17-25

Throughout history, cities answered the needs of their moment. Today, we stand at a rare inflection — to redesign how we live, move and build.

At the heart of Saudi Arabia's shift beyond oil is NEOM: the growth engine translating Vision 2030 into reality. Set at the crossroads of global trade in the northwest, NEOM spans a vast, climate-moderate landscape. It is a special economic zone and greenfield development, powered by 15 sectors and underpinned by landmark real estate already rising.

Its capital city, THE LINE, reimagines urban life — revolutionary, compact, human-scaled. Alongside it, Oxagon serves as the industrial and logistics backbone — shaping advanced and clean manufacturing, supporting construction in NEOM and beyond, and enabling future exports.

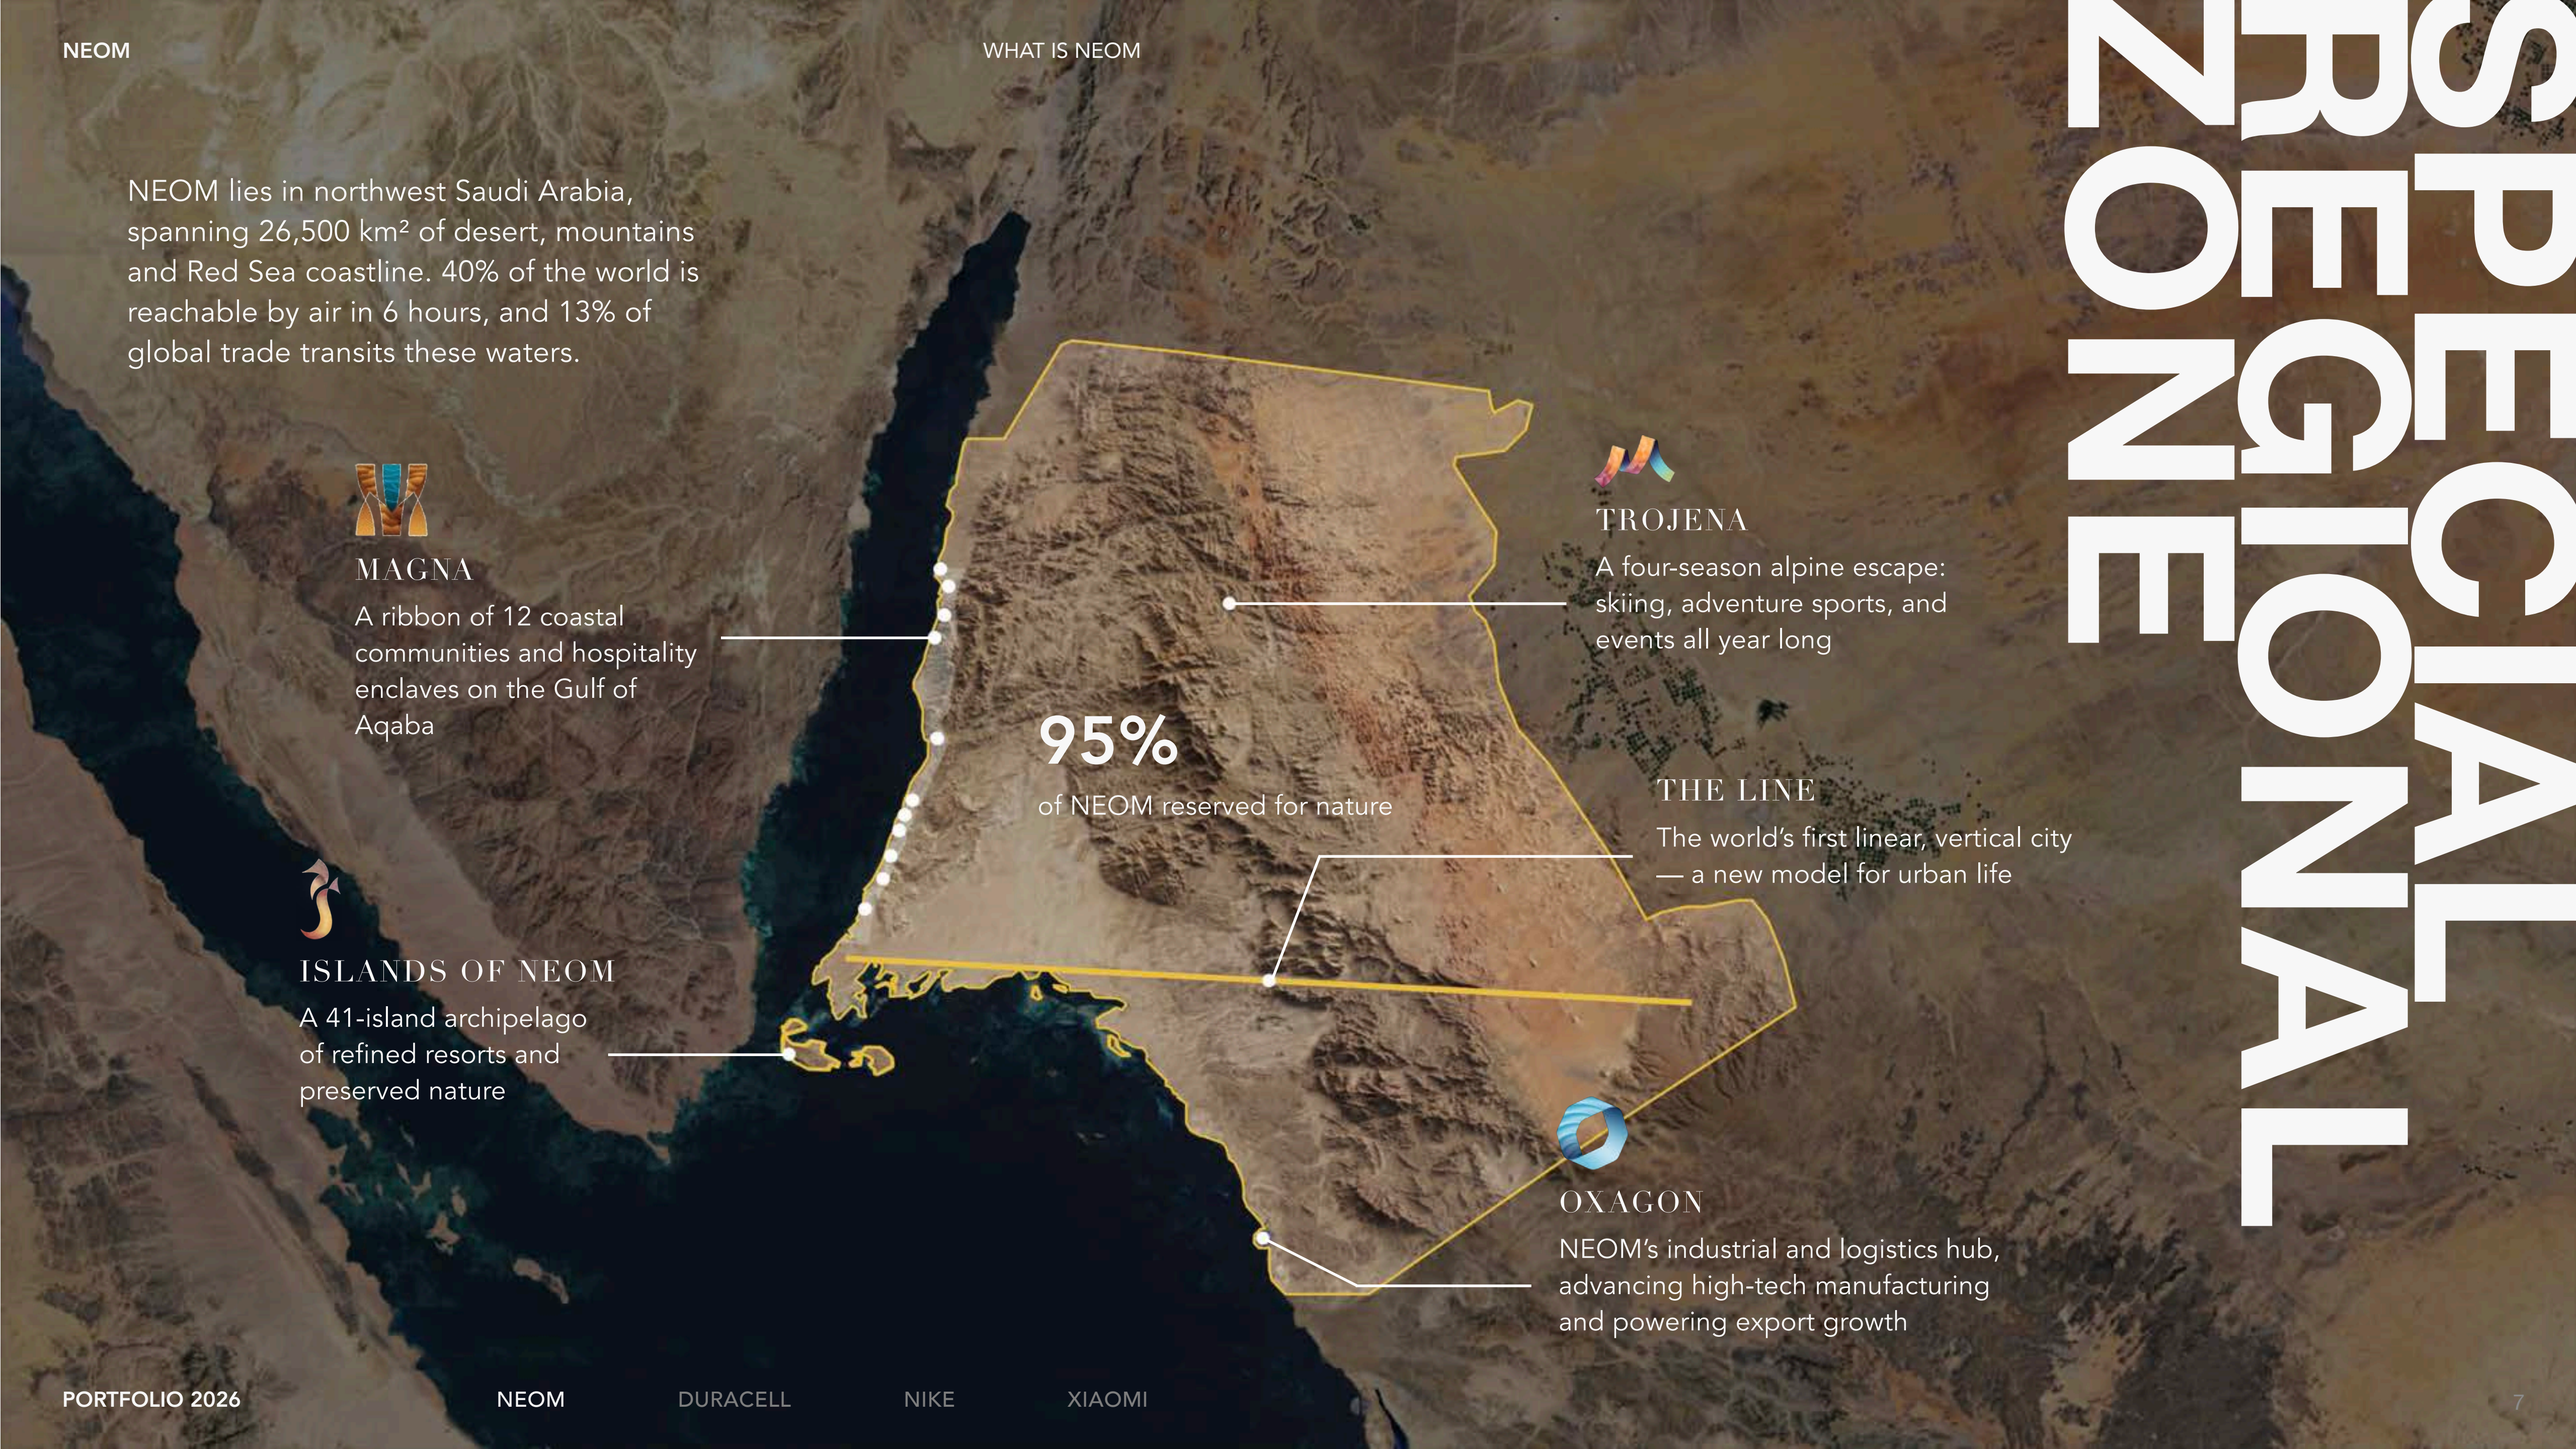

The Islands of NEOM, Magna, and Trojena emerge as destinations experiences — places to gather, recover, and explore.

The priorities are clear: livability first, a business-and-innovation economy, and nature protected by design. Not as an afterthought but built in from the start. City systems, industry and landscapes are planned to work in concert, so progress strengthens place.

Together, NEOM's cities and destinations form a blueprint for tomorrow — where human ambition moves in step with the rhythms of nature, and where there future feels engineered yet alive.

SPECIAL ECONOMIC REGIONAL ZONE

NEOM lies in northwest Saudi Arabia, spanning 26,500 km² of desert, mountains and Red Sea coastline. 40% of the world is reachable by air in 6 hours, and 13% of global trade transits these waters.

MAGNA

A ribbon of 12 coastal communities and hospitality enclaves on the Gulf of Aqaba

TROJENA

A four-season alpine escape: skiing, adventure sports, and events all year long

95%

of NEOM reserved for nature

THE LINE

The world's first linear, vertical city — a new model for urban life

ISLANDS OF NEOM

A 41-island archipelago of refined resorts and preserved nature

OXAGON

NEOM's industrial and logistics hub, advancing high-tech manufacturing and powering export growth

OXAGON MASTER-PLAN

أوكساچون
OXAGON

ROLE	Campaign Lead
SCOPE & SKILLS	campaign strategy & planning ✦ narrative development ✦ content production (online-to-offline) ✦ stakeholder engagement & investor communications ✦ media buying (global + China + East Asia)
OUTCOME	VCR at avg. 25% outperformed industry benchmark ✦ Better performance at lower cost despite niche & high-value targets ✦ sustained brand health and awareness

OXAGON

Oxagon is NEOM's reimagined industrial city, conceived to transform how the world thinks about industry, and to deliver on NEOM's ambition to redefine how we live and work. Together with THE LINE, Trojena and key destinations, it forms part of a shared vision for the future.

Positioned to become the leading global hub for advanced and clean industries, Oxagon integrates innovation, productivity, and sustainability into a single ecosystem.

At its heart, it is a destination for pioneering businesses shaping the future of manufacturing, energy transition, sustainable supply chains, and the new frontiers of technology — from digital systems to robotics. Its foundations include a high-capacity port, advanced digital infrastructure, and a world-class research and development environment, supported by a city designed to attract and inspire the next generation of workforce and communities.

By uniting industry, innovation and people, Oxagon acts as a catalyst for global industrial transformation — where breakthrough ideas, clean technologies, and new models of living and working set the benchmark for the cities of tomorrow.

BRINGING THE OXAGON MASTERPLAN TO LIFE

WHY

Oxagon, the industrial city of tomorrow, needed to elevate awareness among global investors, partners, and industry leaders — building early trust in its progress and potential while Business Development teams drove direct engagements at the lower funnel.

STRATEGY

Position Oxagon as the proof point of NEOM's industrial vision — shifting it from future promise to present progress.

We focused on top and mid-funnel growth: creating consistent visibility, borrowing credibility through trusted voices, and using innovation-led storytelling to keep Oxagon relevant as the city takes shape.

HOW

- Created an evergreen content program evolving with Oxagon's development, sustaining visibility and relevance over time.
- Directed cross-market media buying to reach investors, opinion shapers, and industry partners — sharpened through ABM targeting and alignment with Ipsos survey insights and BD priorities.
- Positioned Oxagon through thought leadership, investor engagements, using progress and innovation narratives that reinforce trust.
- Equipped BD team with adaptable content toolkits to strengthen relationships and drive conversations further down the funnel.

IMPACT

Brand tracking showed awareness holding at strong levels, while consideration has risen significantly since 2022 — clear evidence that Oxagon's positioning is gaining traction with key segments.

BRAND (Ipsos B2B Brand Health Tracker, 2025)

- **Awareness 66%**, up from 65% YoY.
- **Understanding 20%**, steady overall, with investor audience rising from 9% → 20%.
- **Consideration 28%**, up from 23% YoY.
- **NPS stable at 14%+**, with positive scores across most groups.

DIGITAL PERFORMANCE (Global)

- Reached 56M professionals across Oxagon's key audience segments i.e. industries and manufacturing, renewable energy, modern construction, port and tech.
- Achieved an **avg. 25% video completion rate,** outperforming industry benchmark (21.5%).
- Delivered **strong cost efficiency** — CPM and CPC came in lower year-on-year, despite niche, high-value B2B targeting.

STRATEGY

NOW

A bold masterplan with no tenants on the ground, and the challenge of building credibility and global awareness before physical progress was visible.

BRIDGE

LEGITIMACY THROUGH **PROOF**

Shift from vision to validation by showing tangible progress — physical, regulatory, economic. Convert skepticism (*too ambitious*) into belief (*it's happening*), de-risking the decision for companies to relocate.

BORROWED TRUST, **BUILD AUTHORITY**

Align Oxagon with globally trusted partners e.g. industrial heavyweights, consultancies, research institutions. Leverage their endorsement to lend credibility faster, shifting Oxagon from a national vision to global movement.

MARKET-MAKING, NOT JUST MARKETING

Position Oxagon as the engine of a new industrial order, not just another project seeking tenants. Oxagon isn't competing with existing hubs; it's creating the next one. Convince companies that by not being here, they risk being excluded from the new industrial order.

PROGRESS WITH **PURPOSE**

Anchor Oxagon in the inevitability of energy transition and technological reinvention. Oxagon isn't just an option; it's a necessity if businesses want to remain future-proof. Reframe Oxagon as the natural alignment of profit and sustainability.

ADAPTIVE NARRATIVE, **IMMUTABLE** VISION

Keep the core vision fixed — advanced & clean industry — while flexing narrative emphasis to fit market mood, ensuring the story stays relevant through cycles (e.g. In downturns emphasize cost efficiencies and logistics, in booms emphasize innovation and future-first). Future-proof the brand against changing global conditions while keeping the end state consistent.

FUTURE

A thriving, advanced and clean industrial hub that anchors KSA's diversification story and redefines global industry.

SPOTLIGHT: CHINA PERFORMANCE

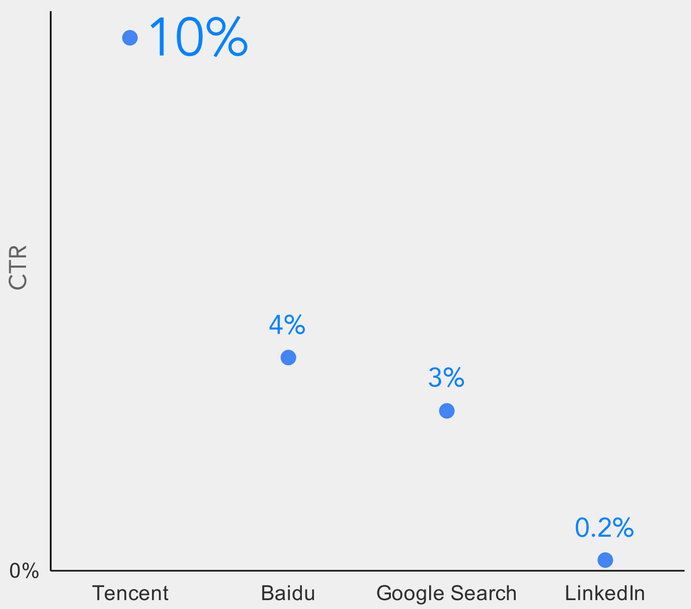

Brand-led campaign in China delivered strong results, with Chinese platforms outperforming global channels, signalling market demand and accelerating trust in a high-value, high-barrier market.

CHINA OUTPERFORMS GLOBAL BENCHMARKS, SIGNALING MARKET APPETITE

With China being one of the priority markets, we scaled media investment from 7% (2023) to 23.5% (2024). Campaigns were custom-built for Huawei, Tencent, Baidu, and WeChat, reaching decision-makers across industrial innovation and investment sectors. Chinese platforms outperformed global benchmarks and delivered superior engagement efficiency, a clear signal of market appetite and rising trust.

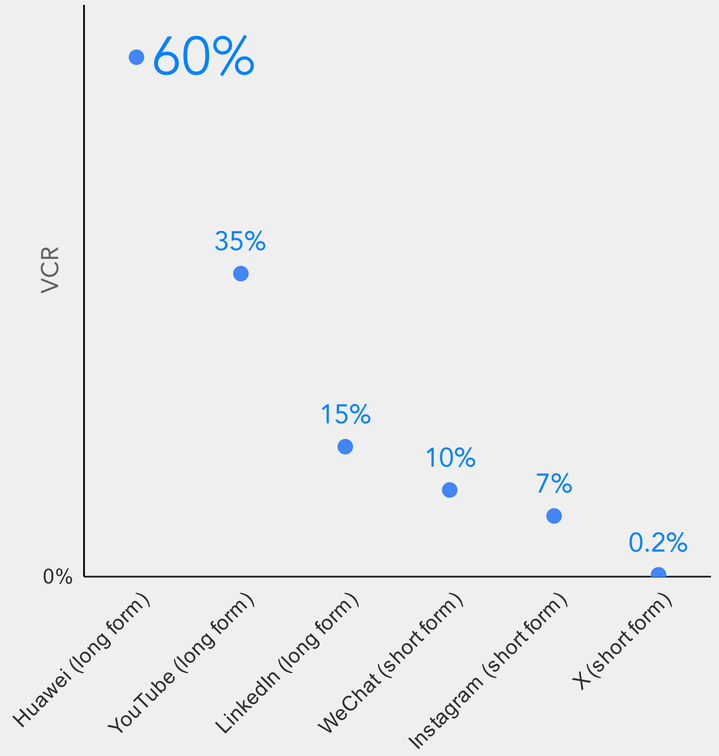

WEB VISITS

Tencent and Baidu delivered the strongest engagement efficiency in B2B contexts. Baidu also outperformed Google Search with higher CTR and lower CPC ($0.81 vs. ~$1.50), proving cost-effective in a premium market.

VIDEO ENGAGEMENT

Huawei achieved a 60%+ video completion rate, outperforming global benchmarks. WeChat short-form videos also outperformed peers like Instagram and X, proving strong resonance among Oxagon's core targets.

*Results reflect performance across all markets, with China platforms compared against global peers for context.

24.8K
Unique visitors

We developed a mobile-first, custom microsite that lives on Huawei devices, capturing strong interest from business decision-makers, with **visitors spending 6x longer than industry benchmarks and engaging more deeply across the full content journey.** These results validate both the precision of our targeting and the appetite for Oxagon's story.

PORT OF NEOM & OXAGON

Port of NEOM, located in Oxagon on the Red Sea, is one of NEOM's first operational assets and a vital gateway for its rapid development. It links NEOM to global trade lanes, powers Oxagon's manufacturing base, and supports construction across the project, setting up the region for long-term trade growth.

Beyond infrastructure, it serves as a testbed for innovation. Through the **Oxagon x McLaren Accelerator**, scale-ups pilot solutions to port and logistics challenges, showing how industry and innovation are designed to work in concert.

In 2024, the port handled 250,000 TEUs and over 1,000 vessel calls. Capacity is set to grow to 1.5 million TEUs by 2026, scalable to 10 million. Built for sustainability from the ground up, it already generates 50% of its energy needs from on-site solar and is transitioning toward full reliance on renewables.

A new integrated logistics and rail network, co-developed with DSV, is also underway, positioning the Port as the backbone of Oxagon's industrial ecosystem and a key enabler of NEOM's broader economic vision.

INVEST-ORS

Developed full content layer for Investor Day @ KAUST.

MASTERCLASS

Captured content from the masterclass to build a reusable library for future cohorts and storytelling.

PORT OF NEOM SOUGHT NEXT-GEN TECH & LOGISTICS TO DRIVE EXPANSION

WHY

Port of NEOM needed next-gen tech and logistics solutions to power its expansion, while building a pipeline of investor-ready startups aligned with growth priorities.

HOW

- **Segmentation:** 7 thematic focus areas were created, with tailored messaging and creative to attract fit-for-purpose ventures.
- **Audience targeting:** We profiled our audience, and precise targeting methods were applied across digital channels (VOD, search, programmatic, display, social).
- **Learn, adapt, optimize:** Campaigns optimized in-flight. Continuous testing and budget reallocation to top-performing tactics sustained and drove performance.

IMPACT (2024 vs 2023)

The campaign delivered measurable gains in both brand visibility and business outcomes, with applications rising by two-thirds YoY, and investor-ready ventures increasing as well.

BUSINESS OUTCOMES

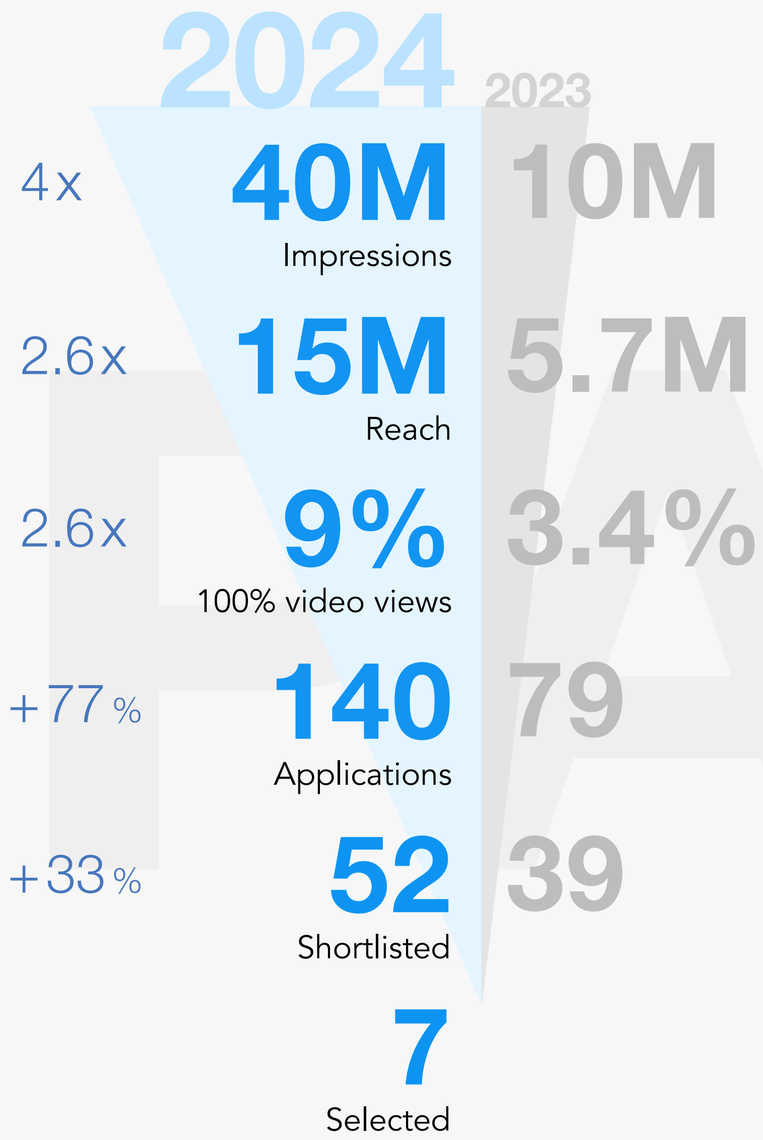

- 131 applications (+66 % YoY), including 52 qualified scale-ups selected (+33 % YoY).

BRAND

- 40M impressions (4× YoY)
- 15 M reach (2.6× YoY)
- 9 % full-video views (2.6× YoY)

RECRUIT COHORT — PERFORMANCE AT A GLANCE

The accelerator didn't end with the digital campaign; attention had to converted into investment. After shortlisting seven scale-ups, a 16-week readiness track refined propositions, pressure-tested pitches, and sharpened evidence

In parallel, a full investor engagement layer was built — from keynote structure and large-format screens to stage graphics and founder dossiers — creating a cohesive showcase of Oxagon's and Port of NEOM's vision.

Distributed ahead of Investor Day at KAUST, the materials prepared venture firms and partners for in-person sessions. On the day, founders delivered timed pitches, live demos, and 1:1 discussions, enabling investors to assess each innovation first-hand.

The approach secured follow-up meetings and funding conversations, setting a new standard for future cohorts, turning a one-off marketing effort into a repeatable deal-flow engine.

INVESTOR DOSSIER

INVESTOR DAY

AS THE CAPSTONE OF THE ACCELERATOR PROGRAM, A **TWO-DAY MASTERCLASS** AT THE McLAREN TECHNOLOGY CENTRE BROUGHT THE 7 SCALE-UPS TOGETHER

The workshops distilled elite motorsport operating principles and advanced manufacturing practices into actionable playbooks for port innovation. These were anchored on priority use cases at Port of NEOM: autonomous cargo handling, predictive and digital-twin operations, environmental monitoring, and safer, more efficient throughput.

McLaren's race craft — clear roles, disciplined decision protocols, and relentless micro-improvement — combined with Oxagon's manufacturing framework of connected flows, circularity, resilience and continuous learning, provided the scale-ups with a proven blueprint for scaling port-tech solutions.

Once the foundation was laid, the program shifted quickly from principle to practice: pit-stop tear downs revealed how stripping complexity accelerates action; live race simulations and visualization labs rehearsed rapid decide-act-debrief-iterate cycles under pressure; and technical floor walkthroughs demonstrated how standardized work, instrumentation, and tight feedback loops multiply performance.

FOR THE SCALE-UPS

Founders left with a shared vocabulary, a lean feedback rhythm, and a repeatable pilot blueprint (clear hypothesis → instrumented measurement → rapid adjustment) — moving beyond one-off proofs of concept.

FOR OXAGON & PORT OF NEOM

The workshops doubled as content capture, producing a reusable media bank for brand storytelling, future cohorts, and investor engagement. The outcome: a faster idea-to-pilot-to-scale cycle and evergreen assets that keep delivering value

DURACELL

DIGITAL MATURITY AUDIT + CX MAP 27-29

GAMIFY BRAND EXPERIENCE 30-35

DIGITAL MATURITY AUDIT + CX MAP

ROLE	Project Manager
SCOPE & SKILLS	CX journey ✦ maturity benchmarking & roadmap development ✦ project & stakeholder management ✦ insight synthesis ✦ quant + qual research
OUTCOME	Duracell's first online-to-offline CX maturity baseline ✦ 3-year improvement roadmap endorsed by leadership

SHIFTING FROM TV-LED MODEL TO DIGITAL

WHY

Duracell's TV-heavy model was losing younger, digital-first buyers between online research and in-store purchase. The brand set out to pivot toward a digital, consumer-led growth strategy, with the shift marking the critical step toward business growth.

HOW

- Designed a CX-maturity scorecard to benchmark capabilities and enablers.
- Conducted qualitative research (in-depth interviews, focus groups, stakeholder sessions) to capture needs and pain points.
- Developed detailed CX and cognitive journey maps, followed by a 3-year roadmap with benefit tracking.

IMPACT

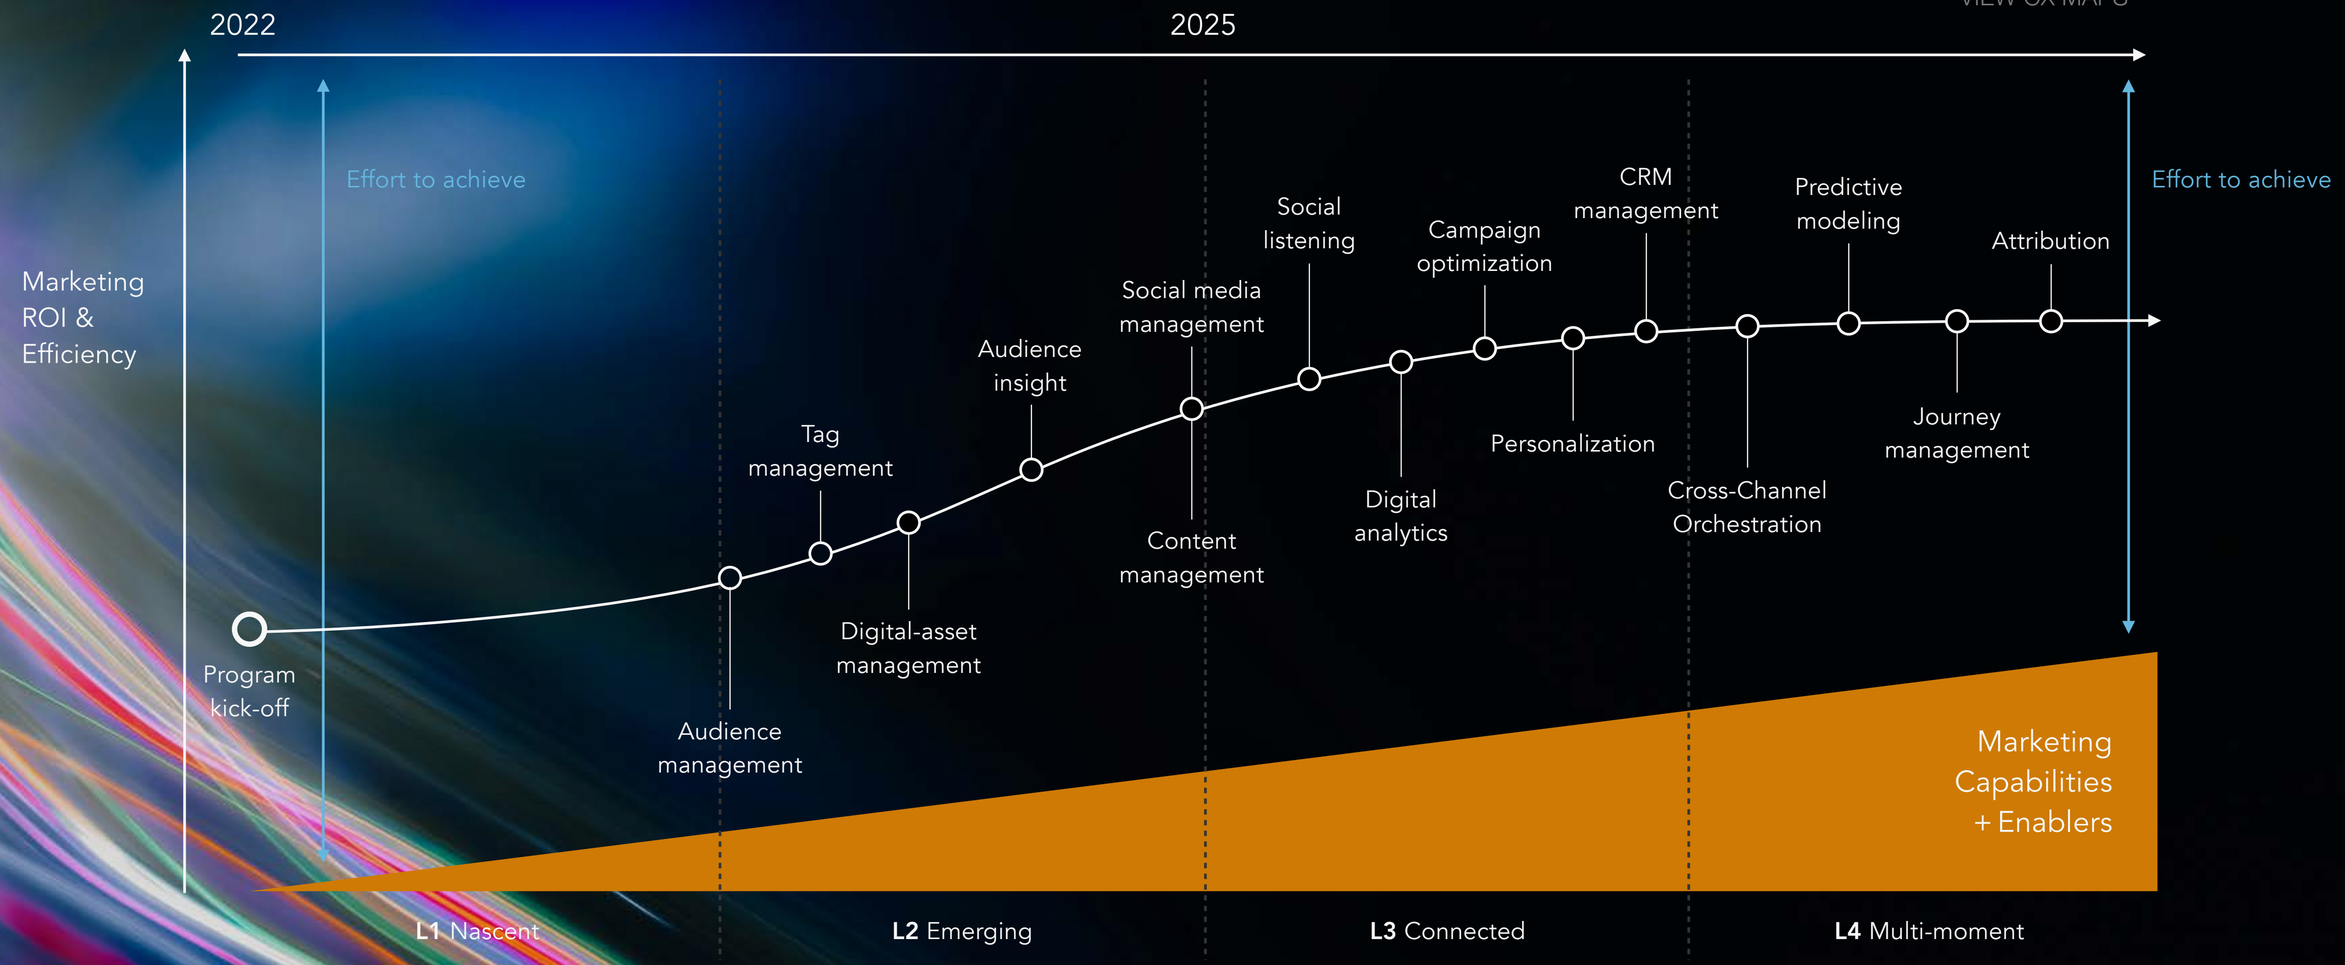

The program delivered a clear roadmap and immediate wins while laying the foundation for Duracell's long-term digital transformation.

- Duracell's first **unified online-to-offline CX map**.
- High-value digital *quick wins* queued and funded.
- Paved the way for long-term transformation — shifting from TV-led to data-driven, customer-led growth.

Bunny Hop game on Meta Spark AR: 10K plays in 5 days with 17× engagement vs brand baseline ✦ **TikTok football duet:** 17M views in 4 weeks with +15 % search volume ahead of peak retail season

RECHARGE BRAND ENGAGEMENT INSIDE SOCIAL STREAMS

WATCH DEMO

WHY

Gamers already love the Duracell Bunny, but the brand's digital touchpoints felt flat. The goal was to turn passive scrolling into interactive experiences, giving fans new ways to connect with the Bunny.

HOW

- A retro, 8-bit "endless runner" game was launched through Facebook and Instagram filters (Meta Spark AR) — no downloads required, instantly shareable.
- Partnering with Xbox raised the stakes: top scorers could win custom Xbox Design Lab controllers.
- Built frictionless participation through instant score-and-share loops that encouraged replay and social sharing.

IMPACT

- **17× longer video engagement** vs baseline social content.
- **10,000 organic plays** in the first 5 days of release, with zero paid boost.
- Proof-of-concept that **AR-enabled gaming** can deepen brand stickiness and open new pathways for future launches.

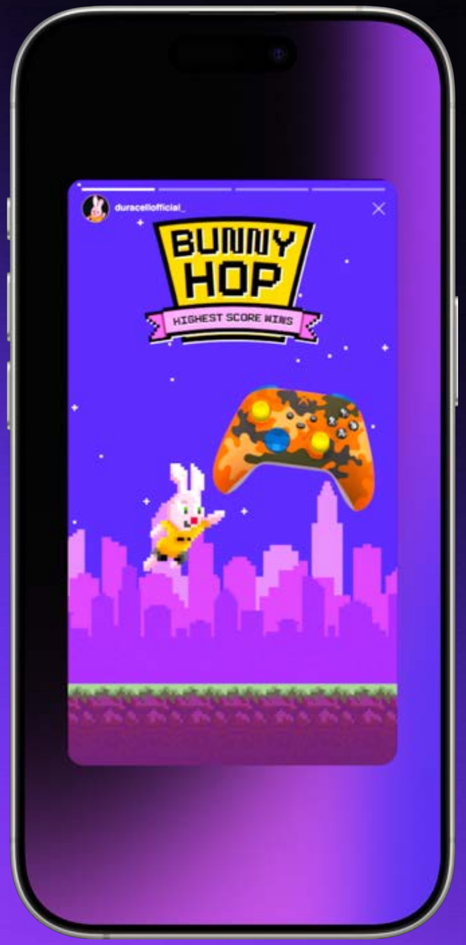

BUNNY HOP — PLAYER JOURNEY

🐰 GAME ON 🐰

⚡ KEEP HOPPING ⚡

⏫ LEVEL UP ⏫

🎮 YOU WIN 🎮

AR GAMING · NO DOWNLOADS · XBOX COLLAB · ENGAGEMENT

GAME ON: DUET THE BUNNY & WIN

WHY

With World Cup chatter forecast to surge, the moment was anticipated to ensure Bunny entered the conversation at scale. TikTok's duet format offered a low-barrier way to put the brand at the center and invite fans to co-create.

HOW

We designed a football-skills challenge, inviting fans to duet/keepy-uppy with the Bunny for a chance to win prizes and hospitality tickets. The CGI Bunny, as always built in Unreal Engine, was optimized for TikTok's format.

A cross-channel countdown followed, with VOD ads across Sky Sports, YouTube, and Meta driving UK football fans and gamers into the challenge.

IMPACT

The campaign was received positively and lifted retail search demand significantly ahead of peak season.

- **15% surge in Google search volume immediately before peak retail season,** 25 % above the norm for the same period.
- **17M TikTok views** within 4 weeks, reaching millions across the UK.

NIKE

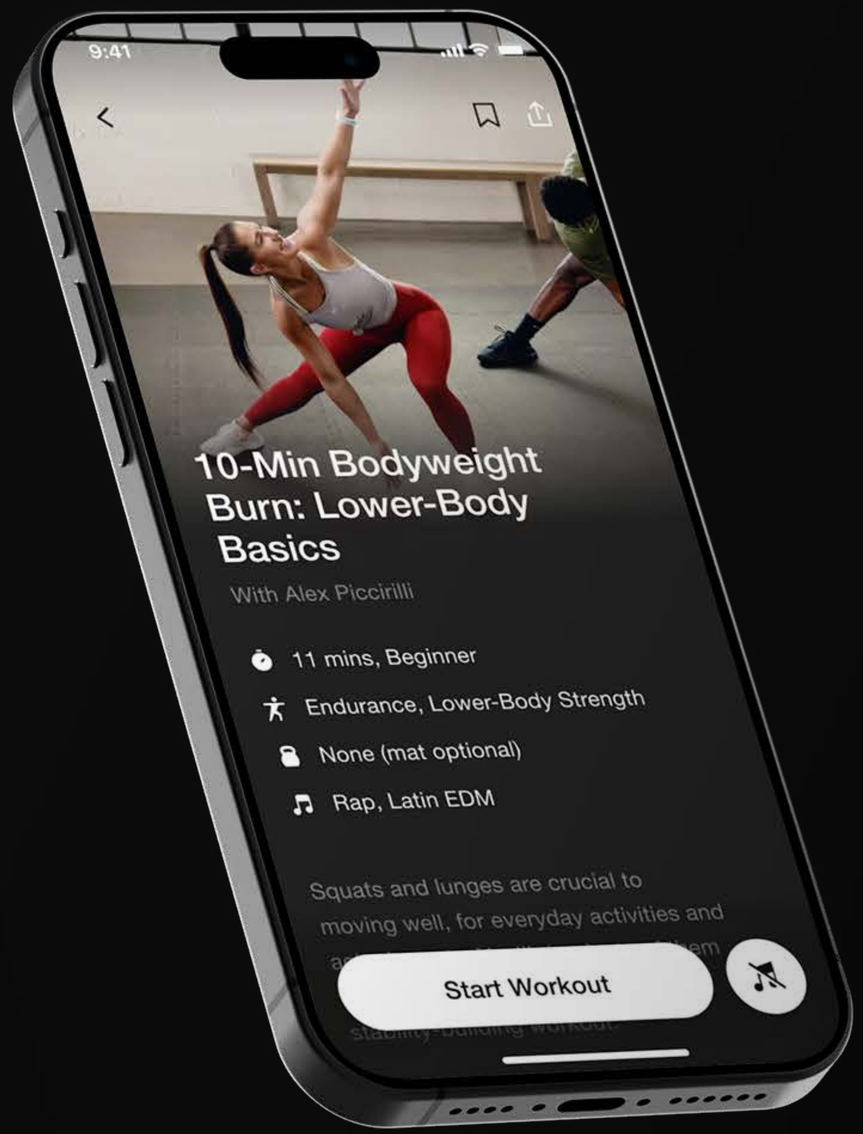

NIKE TRAINING CLUB: WOMEN'S COMMUNITY PILOT

ROLE	Experience Strategist & Operator
SCOPE & SKILLS	experiment design ✦ content strategy & planning ✦ quant + qual research ✦ community management ✦ project management ✦ creative & art direction
OUTCOME	+64% engagement in consumer-led in-app community ✦ 3× participation ✦ 1.7× sales

EMPOWERING ENGAGEMENT THROUGH COMMUNITY-CENTRIC EXPERIENCES

WHY

Post-pandemic, competition in digital fitness surged, and Nike sought to strengthen its direct-to-consumer ecosystem. With its female audience growing rapidly, the brand tested whether deeper, community-led experiences within its own channels could drive sustained engagement, retention, and purchase intent.

HOW

Three women-focused spaces were created inside the Nike Training Club app (NTC): **brand-led, coach-led, member-led.** Each offered live chats, training programs, nutrition tips, events and in-person meet-ups.

Content mixes and posting cadences were varied across the groups to identify which model was best at keeping members engaged.

IMPACT

- **Member-led space outperformed**, showing that peer support combined with professional coaching drives stronger motivation than athlete or brand instruction alone.
- **3× in-app participation** and **1.7× purchase lift** in the member-led cohort.
- **+32% avg. engagement** across all communities in the first 4 weeks; a further **+64% engagement** after targeted push notifications and email was introduced.
- Identified high-value user segment that helped shape future product and roadmap decisions.

Program kick-off

STRATEGY, BUILD & RECRUIT-MENT

I partnered with product and marketing science teams to co-design a lean community layer modelled on Instagram. We defined hypotheses and cohorts, and recruited subjects from existing Nike members. To ensure clean measurement, no pilot details were disclosed in advance.

EXPERIMENT DESIGN & INSTRUMENT-ATION

Developed the test playbook and content plan, set KPIs, and worked with the data science team to install instrumentation, dashboards, and pulse surveys — enabling clear measurement and insights.

TOOLKIT & CREATOR ENABLEMENT

Delivered a creator toolkit with shooting guides, livestream best practices, and community prompts.

Coached athletes on cadence, content creation, and moderation to keep communities active and thriving.

Directed the pilot photoshoot from concept to execution — planning shot lists, blocking, styling, and formats for high-quality content.

LIVE OPS: STAGED ROLLOUT & WEEKLY ITERATION

Led content operations through a staged rollout: Foundations → Interaction → Rituals → IRL.

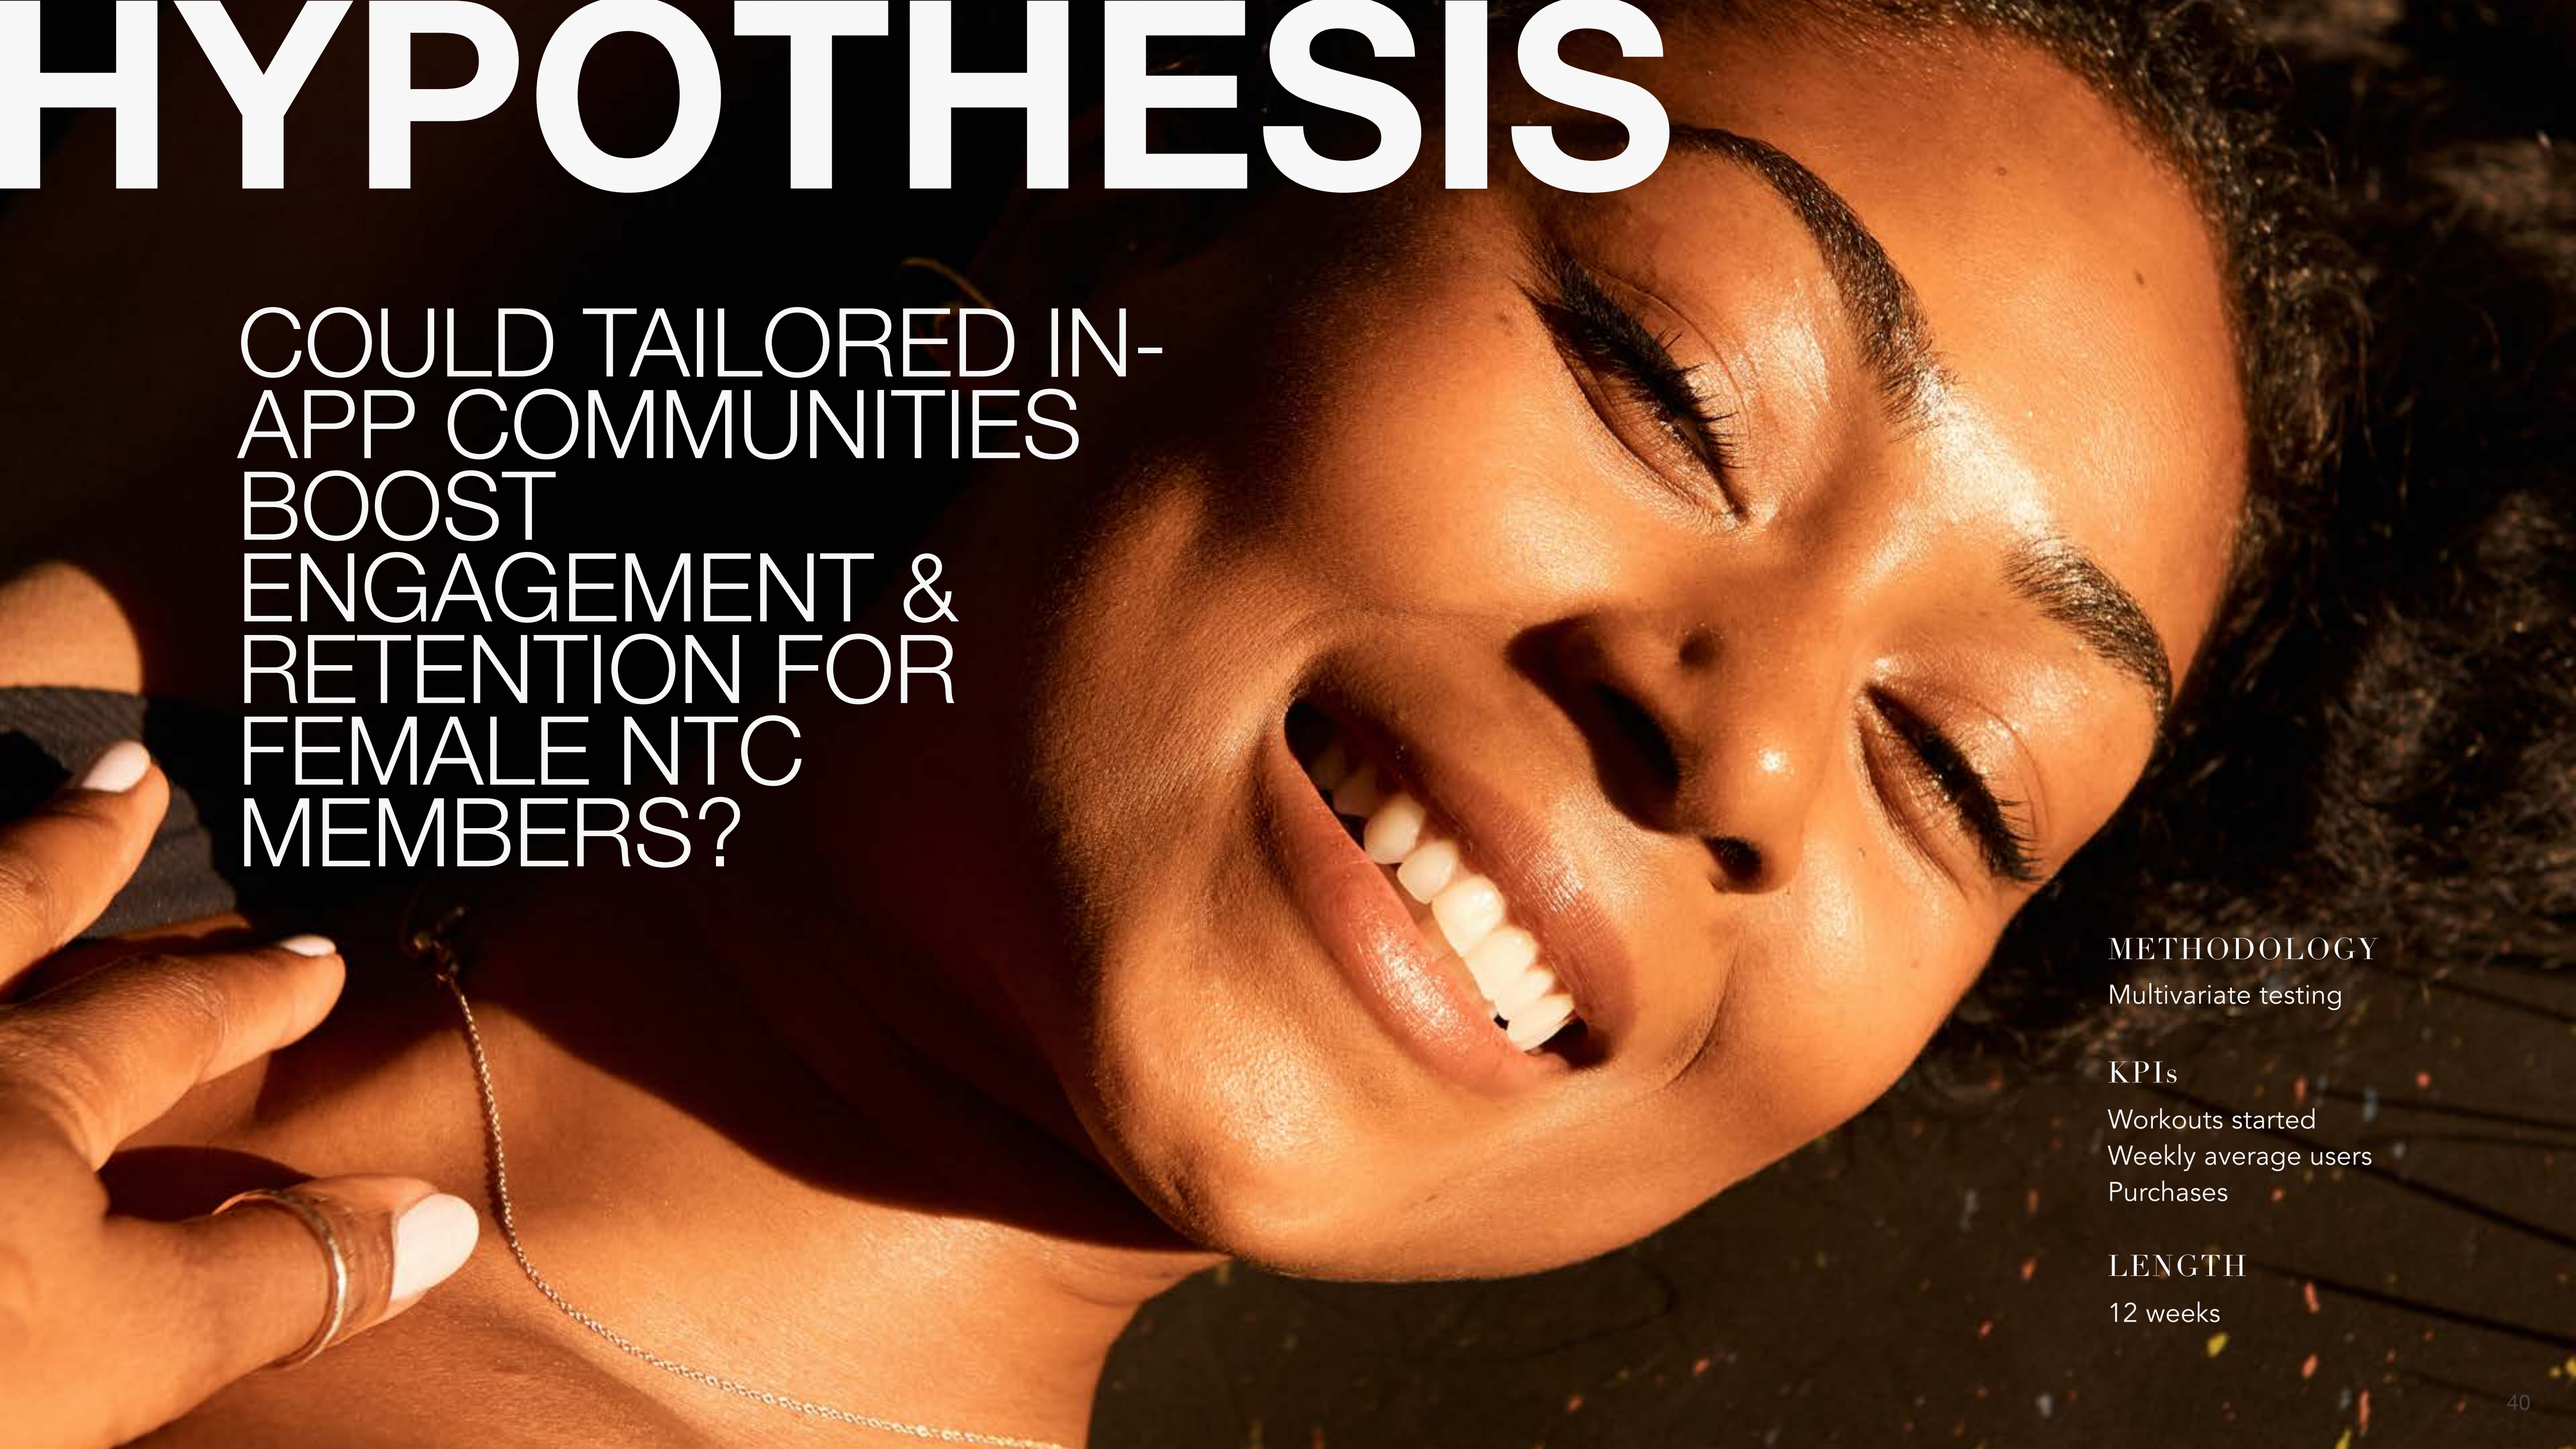

Published on a steady cadence, reviewed weekly, and applied learnings in real time. Features were layered progressively — chats, challenges, livestreams, and meet-ups — to keep the community growing each week.

Metrics and pulse surveys informed content, UX, and engagement adjustments, resulting in stronger peer bonds, higher workout starts, and measurable purchase lift.

CLOSEOUT & HANDOVER

Consolidated all findings into a clear playbook — what to scale, what to fix, and next product moves — and handed it off to teams for future product and roadmap considerations.

XIAOMI

XIAOMI Mi 11 FLAGSHIP LAUNCH

ROLE	Content Lead
SCOPE & SKILLS	campaign strategy & planning ✦ media buying ✦ influencer marketing ✦ UGC & community activation ✦ livestream-shopping ✦ pop-up concept store ✦ retail partnerships
OUTCOME	#1 SoV on launch day ✦ 1M views on live keynote ✦ strong sales momentum created

BUILDING THE LAUNCH PLAYBOOK

WHY

Xiaomi has grown rapidly beyond smartphones into a full consumer tech brand—but in the UK it remained a challenger with limited awareness. To break into the flagship tier, the Mi 11 launch needed to turn buzz into retail performance and build credibility in a crowded market.

HOW

We combined high-impact OOH with digital activations across UK channels to reach both mass and premium audiences.

- **Reach:** Citywide DOOH & OOH takeovers across London and major UK cities.
- **Engage:** Hybrid strategy of virtual keynotes, live events, influencer collaborations, and timed product drops.
- **Convert:** Amazon and carrier promos (Three, Vodafone) with exclusive livestream-driven offers.
- **Elevate:** Flagship Harrods pop-up showcasing Mi 11 and concept models to signal premium credentials.

IMPACT

The launch delivered impact across awareness, engagement, and sales, proving the effectiveness of an integrated, multi-channel playbook

- **#1 share-of-voice** in the UK on launch day.
- 2.2 M video views, including 1M+ livestream views.
- Sales momentum established in the first month, securing early market share gains.

TEASE LAUNCH SUSTAIN

MEASURE → LEARN → OPTIMIZE

Build curiosity + capture intent

- Creator teases + exclusives
- Waitlist + notify-me capture
- Digital + VOD + social teasers
- PR seeding

Win launch day + convert demand
